

ANACONDA SEALTITE®

**Applicable in the
steelworks and other
heavy industries**

ANACONDA SEALTITE®

Application areas for Anaconda Sealtite – Conduit systems

Heavy machine industry: Presses, Machinebuilding, Drilling-Millingmachines, Foundry equipment, Glass industry equipment, Metalworkmachinery, Papermill and related machinery, Woodcutters and milling machinery, Tyremachines, Buildingmachines, Meatplant machinery, Bakerymachinery, Yoghurt-fillingmachinery, Milk industry machinery.

MRO activities in: Papermills, Woodmills, Cuttingmills, Assembly lines, Steelworks, Glassmanufacturing, Foundries, Aluminiumcasting, Powerplants, Tyre-industry, Rubberindustry, Tarmac-machinesfabriken, Softdrinkindustry, Breweries, Meatplants, Bakeries, Chemical Plants, Pharmacie-Industry, Betonindustry etc.

Rolling stock equipment : Adtranz, Bombardier, Siemens, PFA etc. DB – SBB – ÖBB – NS – DSB .
p.e. Double deck-Wagons, ICE – ICT, Locomotives, Long distance coaches, Street trams, Expo-2000. etc., E-Lok 185.

Application area's for Anamet plastic conduit systems

Light machine building: Packagingmachines all industries, Woodcutters, Material test machineries, Material control and transportmachines. Automotive-Industry, Cabinetbuilders etc.

Other important Anamet – Conduit applications are

Robot-Industry – UI-Type.
Powerplants, UI-Type for conections of the control systems.
System maintenance in all large plants.
Protection against Vandalism and rodents.

Conduit systems improve the product safety and continuity. For this a increase of production equipment is possible, lower risk for breakdowns and higher machine efficiency output.

CONDUIT SYSTEMS AT EQUIPMENT IN THE FOUNDRY INDUSTRY

SMS-Demag: Complete installations for the steelworks. In this case Anaconda-Sealtite® Conduit-Systems are used for the general cable protection here high mechanical protection, corrosion protection and heat protection is needed. Also the Hiprojacket® and Hiprotape®, Hipro-blanket® and Thermojacket® in the area's of fluid steel are used.

UHDE: Hiprojacket® and Hiprotape® in the cable protection for the meltingovens.

Otto Junker: Hiprojacket® and Hiprotape® in the cable protection for the meltingovens and other heat producing installations.

Paul Wurth: Meltingovens; in this case Anaconda-Sealtite® conduit Type MULTIFLEX UI stainless steel system in combination with Hiprojacket® is used.

The Anamet Products can be found in various foundry equipment machinery, melting ovens, warm and cold rolling mills, overheadcrans, fluid steel transporters

Other well known companies who are using the Anaconda-Sealtite® products are Kuka, ABB, Motomann, Induga, VA Tech, Siemens, Friedr. Kocks, Ansaldo, Müller Weingarten in the welding and manufacturing robotics.

Other companies like ZPF Therm, Eirich etc. who build machinery for the seelworks also have choosen for the high quality solutions of the Anaconda-Sealtite® conduit-systems.

Steelworks like ThyssenKrupp, Arcelor, HKM, Arcelor, Cockerill, Mittal Steel and Corus use on different spots in their production the Anamet Products. Due to their high quality level and high life time expectations those products are choosen to be used.

These industries also use Hiprojacket® und Hiprotape®, Hiproblanket and Thermojacket® for areas where electrical and mechanical leads have to be protected against high temperatures.

The Anamet High temperature-cable, like Soaking Pit and Flamrox cable are used in crane-installations and furnace-covers as well at other areas of the furnace.

In addition are the Anaconda-Sealtite® conduit-systems to be found in: Transformers like Siemens, ABB and VA Tech for transformers up to 400 KV, large generator sets and Turbomachines (Siemens and MAN) but also in maschinery for the Glass-industry, like flatglas, hollowglass. Also Aluminium Industry, like founderies and die-casting appreciate the high quality standard of the Anamet Produkts.

ANAMET EUROPE

Do you have a Problem? Anamet Europe has de solution! There are various application area's with flexible conduits for installing a Sealtite Conduit for elctrical cables and wires.

In relation with our customers Anamet is able to seek and find solutions with custom made conduit systems. Anamet Europe is also Importer for various special accessories in UL / CSA and can be recognized as a specialist in this field.

Anamet Europe, a company with more than 60 years experience in the european industry.

Anamet produces according ISO-9001. Many large manufacturers, in Europe, already approved our Quality system and rely on the products we offer.

Anamet Europe is your specialist for flexible solutions; high quality for high demands.
